TALIM ANSARI

Senior Frontend Developer (React.js, Next.js)

📞 919501853758   ✉ talimansari73@gmail.com   📍 Ludhiana | Punjab   🔗 [LinkedIn](#)

ABOUT ME

Detail-oriented Frontend Developer with 5+ years of experience in building scalable, responsive web applications using React.js, Next.js, and TypeScript. Proficient in Redux Toolkit, GraphQL, and REST APIs, with hands-on experience deploying SaaS products and real-time applications. Adept at collaborating with cross-functional teams and delivering high-quality user experiences in agile environments.

EDUCATION

July 2017 - Oct 2020
Lovely Professional University
Grade : 7.5 CGPA

Bachelor of Science in Information Technology (B.Sc. IT)

I hold a Bachelor of Science in Information Technology (B.Sc.IT), which has provided me with a solid foundation in computer science, programming, and web development. Throughout my studies, I gained a deep understanding of various technologies and developed problem-solving skills that have been essential in my career as a front-end developer.

March 2016 - March 2017
Govt. Sen. Sec. (Multipurpose) School
Percentage: 77.33%

Senior Secondary (Computer Science)

I pursued my 12th grade from a Government Senior Secondary School in the vocational stream with a focus on Computer Science. This program introduced me to the fundamentals of computer applications, programming basics, and IT tools. It helped me build early interest and understanding in the field of technology, forming the foundation for my further studies in Information Technology.

EXPERIENCE

Sep 2023 – Present

Rocky Mountain Technologies Pvt. Ltd. – Ludhiana

Senior React.js Developer

- Led development of complex features in React.js applications with minimal supervision.
- Ensured high code quality through performance optimization and best practices.
- Collaborated with cross-functional teams for project planning and execution.
- Played a key role in delivering high-quality, scalable solutions on time.

Sep 2022 – July 2023
DuckTale IT Services – Mohali

Senior React.js Developer

- Built dynamic and user-friendly web applications using React.js.
- Managed application state using Redux/Context API for smooth data flow.
- Optimized frontend performance and improved user experience.
- Refactored existing codebase for better scalability and maintainability.

Feb 2021 – June 2022
Digimantra Labs – Ludhiana

React.js Developer

- Worked on enterprise-level projects using React.js.
- Enhanced code quality and optimized rendering performance across multiple devices.
- Integrated RESTful APIs , GraphQL and managed state using Redux for consistent data flow.

Nov 2019 – Jan 2021
WebRiderz – Ludhiana

Junior Frontend Developer

- Started as a Junior Frontend Developer intern and converted to full-time within 3 months.
- Contributed to building an interactive web application using HTML, CSS, JavaScript, React.js, and Redux.
- Improved application functionality and user experience through iterative development.
- Worked with senior developers to test, optimize, and refactor code for scalability and long-term efficiency.

SKILLS

- **Languages**: JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frameworks**: React.js, Next.js
- **State Management**: Redux Toolkit, Context API
- **Databases / Cloud**: Firebase, Supabase
- **API Integration**: RESTful APIs, GraphQL
- **UI Libraries**: Material-UI (MUI), Ant Design, GrapesJS
- **Dev Tools**: Git, GitHub, Bitbucket, GitLab, Vercel, Netlify
- **Testing**: Jest, React Testing Library
- **Payment Gateways**: Stripe, Razorpay, Clover
- **Development Approach**: Responsive Design, Agile Methodology

PROJECTS

Earthlink

Earthlink site

Overview: EarthLink is a leading U.S. internet service provider, delivering fast and secure internet access to millions of households across the country.
Technologies: Next.js, React.js, Redux.js, TypeScript, GraphQL, and Ant Design.

Flapjack

Flapjack Editor

Overview: Flapjack Software is designed to help restaurants, cafes, and other food establishments create and manage their menus. With a user-friendly interface, it empowers restaurant owners, managers, and chefs to easily design, update, and customize menus without requiring extensive technical or design expertise.
Technologies: Next.js, Redux,TypeScript, Supabase, GrapesJS.

Fakturanu (Invozio)

Fakturanu (Invozio)

Overview: Fakturanu (Invozio) is an online platform that enables individuals to issue invoices without owning a formal company. This service is particularly beneficial for freelancers and self-employed professionals who wish to bill their clients without establishing a registered business entity. By using Fakturanu (Invozio), users can create and manage invoices efficiently, simplifying the payment process.
Technologies: React, Redux ,Socket.io and TypeScript.

Loop POS System

Loop OS

Overview: Loop OS is a comprehensive platform designed to streamline food ordering and business management for both customers and food establishments. The platform enables admins to easily manage and update menus, while also offering a robust POS (Point of Sale) system for efficient order and transaction management. Customers can enjoy a seamless browsing and ordering experience, with real-time updates and notifications powered by Socket.io. Whether you're a restaurant, cafe, or delivery service, Loop OS simplifies operations and enhances the overall user experience.
Technologies:
Next.js, React.js, Redux.js, MUI, Socket.io and TypeScript, .
